From the Book to the Movement: “The 13 Pillar Society of Peace”

By Kawsar Chaya

On May 24, 2025, I had the honor of launching my first book, *The 13 Pillar Society of Peace*, at the Beirut Arab International Book Fair.

This work is more than a book—it is a vision, a seed, and a movement toward a regenerative society built on peace, dignity, and collective consciousness.

Born from the spirit of OтраLerz NGO and the Seven Petal School model, the 13 Pillars call for a new kind of governance—ministries of service, wellness, ecology, education, and human development.

Together, they form the architecture of a living society rooted in harmony between people, nature, and spirit.

This is not the end—it's the beginning of a conscious movement for all peacebuilders, educators, and healers shaping Lebanon's rebirth.

✨ The Movement Begins Now.

13 Pillars Society of Peace

In a world at the crossroads of crisis and transformation, a new paradigm is emerging—one that redefines governance, education, economy, and human consciousness. 13 Pillars Society of Peace is not just a book; it is a research-based blueprint for a future where holistic well-being, ethical leadership, sustainable technology, and collective consciousness guide the evolution of societies.

Drawing from anthropology, quantum sciences, holistic health, and geopolitical strategies, this work expands on the principles of Education 3000's Seven Petals Schools for Peace, taking them to a national and global scale. Through thirteen interconnected pillars, it offers a comprehensive vision of a just, prosperous, and harmonious world—one built on ethics, solidarity, and human potential.

Author Kawsar Chaya, a holistic researcher and peace advocate, brings decades of expertise in education, alternative healing, and social transformation. Inspired by the wisdom of Edgar Cayce, quantum evolution theories, and real-world case studies, she presents an actionable framework to co-create a new humanitarian system—one where politics serves the people, science aligns with ethics, and economies thrive on fairness and sustainability.

If you seek a roadmap for the future, grounded in research and visionary thinking, 13 Pillars Society of Peace is your invitation to be part of the transformation.
