13 Pillars of the future society of Peace Culture

The 7 Petals Schools of

education 3000 prepared us for a 13 Pillars Society with its 13 areas of development, renovated the humanitarian vision applying new strategies of group works and unities for a better place to live on. It is based on new paradigms of solidarity, common sense and deep Peace culture backed up by a multidisciplinary highly qualified research team. Every pillar can be a Ministry on its own on a national level, that can be called 13 departments of Service to people and Earth, installing a "SOFI Acratia", that is a "politic of wisdom", where politicians are wise, intelligent, humanitarian and generous, and are at the service of

their country, the people and the Earth.

7 Petals School Systems and 13 Pillars of the Future

Society of Peace Culture

Based on all the researchers who work on this project from all over the world involving 15 countries for basic information we can achieve this vision. We wrote a book in 2022 in the English language, and now we are working on translating this book to many other languages.

The Security Council Resolution on women and peace and security is a program that has been in progress for a year. As part of this program, the organization has collaborated with international organizations, such as Educatiooon 3000, to create a 13-pillar society of peace. Additionally, a book has been published based on a seven-pillar

program implemented in schools this year.

Now after the pandemic is over

we are working on activating our program and getting the full training for TOT to apply to schools and societies.

At this time we are preparing the full training for 2023 so we can go back to our mission and complete our vision.

In 2019, Educatiooon 3000 entered into an agreement with Otralerz NGO to adapt the Educatiooon 3000 project and provide training to trainers. The goal of this partnership was to implement the pedagogy in public schools, with the ultimate aim of improving education for students as a new way of teaching being a facilitator so students can perform better and bring out the best of them. Having a new generation full of energies and geniuses and a lot

more harmony for success.
